

Basnett Street Nursery School and The Chatterbox Club

## Medicine Policy

We promote the good health of children attending Basnett Street and take necessary steps to prevent the spread of infection; if a child requires medicine we will obtain information about the child's needs for this, and will ensure this information is kept up-to-date.

When dealing with medication of any kind in the nursery, strict guidelines will be followed.

### Prescription medication

- Prescription medicine will only be given when prescribed by a GP to the person named on the bottle for the dosage stated.
- Medicines must be in their original containers.
- Those with parental responsibility must give prior written permission for the administration of each and every medication.
  1. The written permission is only acceptable for that brand name of medication and cannot be used for similar types of medication, e.g. if the course of antibiotics changes, a new form will need to be completed
  2. The dosage on the written permission is the only dosage that will be administered. We will not give a different dose unless a new form is completed
  3. Parents should notify us IMMEDIATELY if the child's circumstances change, e.g. a dose has been given at home, or a change in strength/dose needs to be given.
- The nursery will not administer a dosage that exceeds the recommended dose on the instructions unless accompanied by a doctor's letter
- The parent must be asked when the child had last been given the medication before coming to nursery; this information will be recorded on the medication form. Similarly when the child is picked up, the parent or guardian must be given precise details of the times and dosage given throughout the day. The parent's signature must be obtained at both times
- At the time of administering the medicine, a senior member of staff will ask the child to take the medicine, or offer it in a manner acceptable to the child at the prescribed time and in the prescribed form. (It is important to note that staff working with children are not legally obliged to administer medication)
- If the child refuses to take the appropriate medication then parents will be contacted and a note will be made on the form.
  
- **Basnett Street DOES NOT administer any medication unless prior written consent is given for each and every medicine**

## **Staff medication**

The first aid box for staff should be kept in a readily accessible position, but out of reach of the children.

First aid boxes should only contain items permitted by the Health and Safety (First Aid) Regulations Act 1981, such as sterile dressing, bandages, and eye pads. No other medical items, such as paracetamol should be kept in the first aid box.

## **Storage**

All medication for children must have the child's name clearly written on the original container and kept in a closed box, which is out of reach of all children and under supervision at all times.

Emergency medication, such as inhalers and epipens, will be within easy reach of staff in case of an immediate need, but will remain out of children's reach and under supervision at all times.

Any antibiotics requiring refrigeration must be kept in an area inaccessible to children.

All medications must be in their original containers, legible and not tampered with or they will not be given. All prescription medications should have the pharmacist's details and notes attached to show the dosage needed and the date the prescription was issued. This will all be checked, along with expiry dates, before staff agree to administer medication.

## **Appendix 1**

### **Allergies and Allergic reactions**

At Basnett Street Nursery and The Chatterbox Club we are aware that children may have or develop an allergy resulting in an allergic reaction. Our aims are to ensure allergic reactions are minimised or, where possible, prevented and that staff are fully aware of how to support a child who may be having an allergic reaction.

- Our staff are made aware of the signs and symptoms of a possible allergic reaction in case of an unknown or first reaction in a child. These may include a rash or hives, nausea, stomach pain, diarrhoea, itchy skin, runny eyes, shortness of breath, chest pain, swelling of the mouth or tongue, swelling to the airways to the lungs, wheezing and anaphylaxis
- We ask parents to share all information about allergic reactions and allergies on child's registration form
- We share all information with all staff and keep an allergy list
- Where a child has a known allergy, the nursery manager will carry out a full Allergy Risk Assessment Procedure with the parent prior to the child starting the nursery and shares this assessment with all staff.
- The manager and parents will work together to ensure a child with specific food allergies receives no food at nursery that may harm them.

### Basnett Street Nursery School and The Chatterbox Club

- Seating will be monitored for children with allergies. Where deemed appropriate staff will sit with children who have allergies and where age/stage appropriate staff will discuss food allergies and the potential risks
- If a child has an allergic reaction to food, a bee or wasp sting, plant etc. a first-aid trained member of staff will act quickly and administer the appropriate treatment, if appropriate. We will inform parents and record the information in the incident book and on the allergy register
- If an allergic reaction requires specialist treatment, e.g. an EpiPen, then at least two members of staff working directly with the child and the manager will receive specific medical training to be able to administer the treatment to each individual child.
- A care plan will be written and displayed near the telephone in case of an emergency

### **Transporting children to hospital procedures**

The nursery manager/staff member must:

- Call for an ambulance immediately if the allergic reaction is severe. DO NOT attempt to transport the sick child in your own vehicle
- Whilst waiting for the ambulance, contact the parent(s) and arrange to meet them at the hospital
- Arrange for the most appropriate member of staff to accompany the child taking with them any relevant information such as registration forms, relevant medication sheets, medication and the child's comforter.
- Redeploy staff if necessary to ensure there is adequate staff deployment to care for the remaining children. This may mean temporarily grouping the children together
- Inform a member of the management team immediately
- Remain calm at all times. Children who witness an incident may well be affected by it and may need lots of cuddles and reassurance. Staff may also require additional support following the accident.

**In line with the EU Food Information for Consumers Regulations which came into force in December 2014 we now provide allergen information about the ingredients we use for activities such as baking or play dough or when serving food to children, parents, families and visitors.**
